About me

I am a software engineer from Budapest, Hungary. I am interested in mainly backend/business logic development, and partly in DevOps related tasks. I like working with other people, and I am always open to have a professional discussion about the best solution for a given problem.

In my free time I like to play all kinds of board games, my favorites are cooperative games. I also play video games, mostly puzzle games. When it comes to sport, I am into everything but mainly floorball and bouldering. I do some hobby projects when I have the time, like Advent of Code.

Work experience

2022-:

Kiss Consult Kft – *Software Engineer*

- Multiple projects for different clients
- Working in a team of 2-5 people, depending on the project
- Backend development, little frontend, DevOps related tasks
- Designing and implementing company-wide best practices and standards
- Used technologies: Go, Python, Typescript, Angular, MinIO, OpenSearch, jBPM, Temporal, Keycloak, RabbitMQ, Asterix, PostgreSQL, Electron, Authentik, Redis, Firebase (for notifications), Docker, Podman, Kubernetes, Helm

• Saman

- A SaaS designed specifically for the needs of an oil analysis company
- Simplifying and automating existing workflow
- Integrating with existing and new systems to provide a seamless experience for the users

• Obelix

- An APIaaS managing and handling automated calls and responses for a telephony survey system
- Only developer on the project

• Covint

- A SaaS for showing predictions about the COVID-19 related data
- The client was a team of doctors and researchers
- Predictions were statistics based on the client-provided data

• kAIa

- A SaaS designed to implement an extra layer of security over video calls
- Using face recognition and AI to validate users and detect potential intruders

2020-2021: **Nokia Solutions and Networks** – *Intern*

- Chaos Monkey like tool for testing the robustness of distributed systems
- Worked in a team of 5+
- Developed a component by myself
- Used Go, Docker and Helm charts for Kubernetes deployment

Soft skills —————

Attention to detail

Critical thinking

Teamwork

Communication

Problem-solving

Time management

Other skills —————

English/B2

German/No exam, around A1

Hungarian/Native

Driving license/B category

Hobby projects

- [Advent of Code](#):
 - Problem-solving challenges with daily new problems in December
 - I used mainly Go, but have solutions in Python and Rust as well
 - Prioritizing clean and maintainable code
 - Prioritizing efficient algorithmic solutions and heuristics, not brute force solutions
- [Go compiler](#)
 - A Go compiler written in Go with Antlr4
 - Implemented syntactical and semantical analysis
 - The goal was to get familiar with compiler design and implementation, not to create a production-ready compiler

Education

- 2018-2022: **B.Sc. Budapest University of Technology and Economics**
Majoring in Computer Science, specification: Software Development
Thesis: Automatic Generation of DDS Descriptors from Data Flow Network Models
- 2022-2024: **M.Sc. Budapest University of Technology and Economics**
Majoring in Computer Science, specification: Software Engineering
Thesis: [Simulation of a Rubik's cube puzzle with domain-specific languages](#)
